COSMOS 4.4

WHAT IS IMPORTANT IS GETTING DISCONNECTED FROM THE WORLD & GETTING MORE CONNECTED TO YOUR OWN WORLD (YOUR NEIGHBOURHOOD AND YOUR HOME). SO THE JOURNEY IS FROM CITY (WORLD 1) TO NEIGHBOURHOOD (WORLD 2) AND TO HOME (WORLD 3). THE SENSE OF A WORLD IN WORLD COULD BE ACHIEVED IF:

1. THERE IS SENSE OF WHOLE BUT SOME MEANDERING PATHS, 2. CONTRAST IN QUALITY OF SPACES IN JOURNEY, 3. ENTERING A SPACE WHERE ONE CAN ENGAGE AND CAN GET LOST.

BLOCK CONFIGURATIONS TO ACHIEVE THE REQUIRED EXPERIENCE

A form which creates a courtyard in centre with elements such as staircase, bridges, balconies etc by using one super block and trying to create narrow street like space with the help of L-shaped block.

Trying to create similar experience of courtyard and streets which will lead to contrast experience from huge to narrow. Trying to create multiple platforms which are free of FSI.

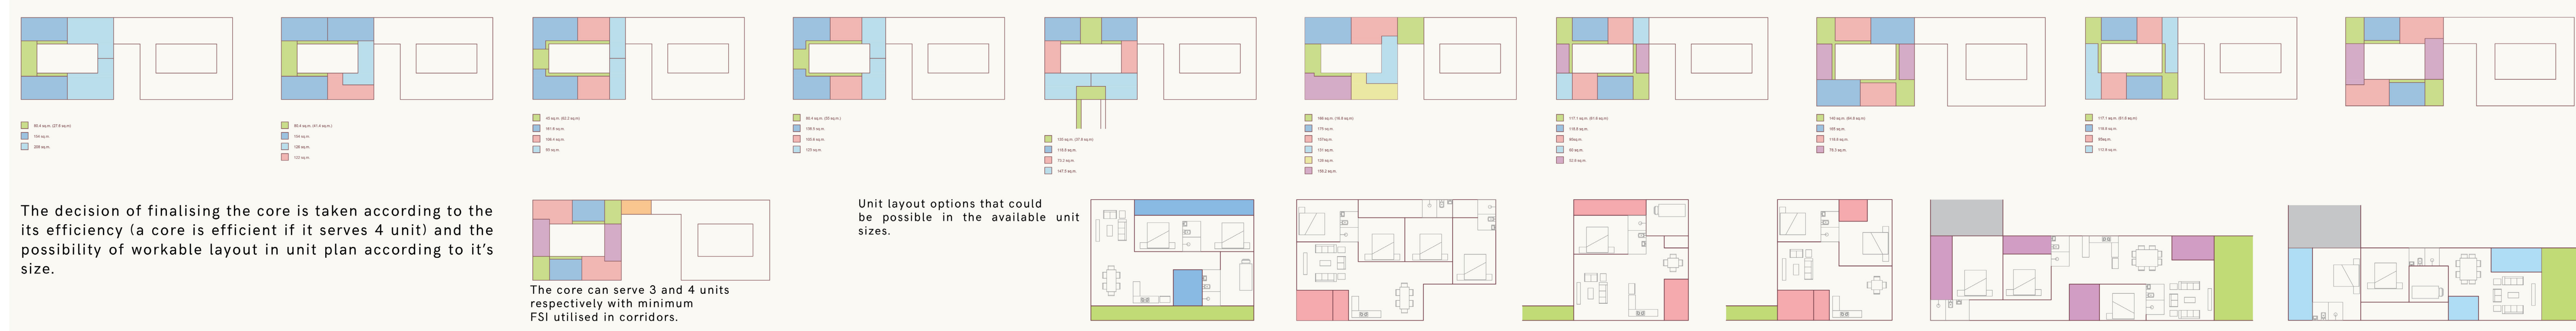

Trying to create 3 types of courtyard with different size and proportion and a configuration which can create multiple niches and corners which can engage people.

Two transitional courtyard like world, - When one enters to + shaped courtyard from city, - When one enters from + shaped courtyard to inner courtyards.

- Creates multiple leaks in the block which can lead to unregulated movement of people and will eventually diminish the experience of "A World".

- A complex form which could be experienced differently when an architect looks at it from a distance/bird's eye view but might not be experienced differently by the users.

VERTICAL CORE AND UNIT POSSIBILITIES IN THE SELECTED BLOCK

- SECURITY CABIN
- REST AREA FOR GUARDS, DRIVERS, ETC
- CAR WASHING AREA
- ELECTRIC SUBSTATION
- GARBAGE COLLECTION AREA
- GYM
- CLUB HOUSE & CONFERENCE ROOM
- STORAGE ROOM
- 2- WHEELER PARKING
- CHANGING ROOMS
- CYCLE STAND PLANTER
- COMMON GROUND AND STAGE
- STEPPED GARDEN
- METER BOXES
- LETTER BOXES
- WASHING AREA, COMMON TOILETS, WATER COOLERS (For gardener, cycle cleaning, etc)

SITE PLAN

4 courtyards which acts as 4 different worlds in which people can move from one to another when they want some specific activity to happen.
